

AirBerth®
BOAT LIFTS

THE *PROVEN* CHOICE

GOVERNMENT
+ COMMERCIAL

Spend more time *in action*
and less on maintenance

The *proven* way to keep your boat out of the water so you can focus on the job at hand.

How does AirBerth optimise your vessel's performance?

- Maximise your vessel's deployment availability, and reduce the time for vessel maintenance
- Preserves the value of your boat by minimising osmosis and electrolysis
- Improves performance and fuel economy with no anti-foul paint and no marine growth on hull
- Eliminates the need to use toxic anti-fouling paints, which have a well documented adverse effect on the marine environment
- Launching and retrieving your vessel in minutes adds valuable mission/deployment time
- Spray jets for hull rinse to remove salt water

AirBerth is the ultimate vessel protection!

The AirBerth Advantage

- High Density Polyethylene (HDPE) is a non-marking and UV stable material
- Isolates air and water for added safety
- High reserve buoyancy can handle areas with high wave action and traffic
- Effortlessly guides your boat into the AirBerth in between mooring guides
- Easily inspect underneath the hull when raised
